PROFESSIONAL EXPERIENCE

Wissen Infotech

Hitech-city, Hyderabad | Feb 2022 – Present

- 10+ months of hands-on experience in designing and developing projects using JavaScript and Angular as a framework.
- Successfully completed training in Front-end technologies like HTML, CSS, JavaScript, Angular, and Unit-testing.
- Performed various tasks and assignments during the training.

Roles And Responsibilities:

- Created responsive web pages using CSS.
- Created projects using JavaScript.
- Designed a JavaScript project which filters the array of countries, and shows the result as a “search”
- Using HTML 5.1 designed the UI of projects.
- Designed components in web pages with the help of bootstrap
- Conducted research and created plans that suit the projects
- Using Angular, I have designed a customer-management app.
- Testing components and producing efficient code.
- Diagnosed required modifications and developed them.
- Implemented grid filter, search, and rendering using Ag-grid.
- With the help of external libraries, I have designed multiple projects like 3d charts, rule sets, query builders, dnd-forms many more.
- Done with a team project using angular and code management with Gitlab.
