## Experience

---

### Trainee Engineer

### [Wissen Infotech](#)

02/2022

- Developed responsive webpages using CSS to ensure optimal display and user experience for devices.
- Built interactive mini projects using JavaScript to enhance functionality and user engagement.
- Designed a JavaScript project that implements an array filtering functionality for countries, providing a Search feature to display relevant results.
- Designed user interfaces for mini projects using HTML5 to create visually appealing and interactive Experiences.
- Utilized Bootstrap to design and implement responsive components within webpages, enhancing their Visual appeal and user experience.
- Conducted thorough research and developed tailored project plans to ensure alignment with project Objectives and requirements.
- Utilized Angular framework to design and develop a robust Customer-Management System, leveraging its powerful features for enhanced functionality and seamless user experience
- By conducting rigorous component testing and implementing optimization techniques, the development process aims to produce efficient code.
- "Following diagnosis, necessary modifications were identified and subsequently developed."
- Ag-Grid was utilized to implement grid filtering, searching, and rendering functionalities.
- I developed an Angular project that simplifies HR's access to employee details, facilitating ease of use.
- I created an Angular project specifically designed for the recruitment team, streamlining the hiring process and providing a user-friendly experience for candidates to apply and secure suitable positions.
- "I utilized React to develop authentication components for registration and login, seamlessly integrating with a JSON Server REST API.
- I incorporated the React Redux state management tool to design a fully functional application enabling users to perform CRUD operations seamlessly, leveraging a JSON Server REST API.
- I extensively collaborated with various external libraries and frameworks such as Bootstrap, High Charts, D3, Ag-Grid, Material UI, React/Redux, and styled-components.

## Education

---

Bachelor Of Technology

Jawaharlal Nehru Technological University

09/2021

- Major In computer Science and Engineering.
